CORE SKILLS

PRODUCT	Risk & fraud systems, internal tools, product ops, workflow design, user flows, prioritization, Kanban, QA/UAT
DATA	SQL, Tableau, Mixpanel, dashboards, fraud flags, false-positive reduction, investigation metrics
OPERATIONS	Marketplace ops, creator campaign management, SOPs, playbooks, training documentation, cross-functional process improvement
TOOLS	Monday, Asana, Notion, Tableau, Mixpanel, SQL, Excel, internal campaign management systems
DOMAINS	B2B2C SaaS, creator economy, marketplace platforms, fraud & risk, campaign management, operations automation
LANGUAGES	Hebrew (native) · English (professional working proficiency)

EXPERIENCE

StreamElements

Full-time · Mar 2021 – Dec 2025

Technical Product Manager — Risk & Fraud

PM

Jul 2023 – Dec 2025

- Owned end-to-end fraud product workflows — investigation systems, fake-account detection, fraud flags, status logic, prioritization queues, automated actions, and internal tooling improvements.
- Stepped up to lead the fraud investigations product area after the PM departed; **partnered with Data and Engineering** to refine detection, and reduce operational friction.
- Defined fraud-related fields, user flows, investigation statuses, fraud-type categories, queues, and prioritization logic across the internal campaign-management system.
- Led QA/UAT for fraud investigation features, translating operational feedback into product improvements that **saved each team member ~5 hours per week**.
- Built a **fake-accounts module** to block fraudulent accounts from receiving offers and introduced a yellow-flag process for suspicious but unconfirmed cases, driving a **~50% reduction in fraud-related support tickets**.
- Supported **~500 investigations per person per week** (~2.5k team-wide) across ~20 campaigns/month.
- Built and maintained dashboards, SQL queries, playbooks, SOPs, and training docs; reported findings to leadership including the CTO.
- Saved **~10 hrs/week on personal fraud workflows**, plus ~5 hrs/week per team member through investigation process improvements.
- Delivered cross-departmental training for Campaign Managers, Creator Success, and Support.

Operations Team Member

OPS

Mar 2021 – Aug 2024

- Managed creator campaign operations at scale across 3-6 concurrent clients and budgets from ~\$50k to \$2M, owning execution for major clients including HelloFresh, Plarium, Scopely, and Lilith Games.
- Produced client spend reports twice per week; coordinated with Customer Success and Creator Managers; communicated directly with clients on budget progress and operational reporting.
- Identified a major client reporting issue where billable events were limited (standard reporting process) despite broader contractual terms; **corrected the reporting logic and increased billable events**.
- Saved **~4 hrs/week on spend-report preparation** per client using automations and by building permanent reports with the data team.

PRODUCT MANAGEMENT TRAINING

Product Experts — Product Management Course

In Progress · Expected Jun 2026

Practical PM training covering product vision, roadmap creation, MVP validation, product-market fit, Business Model Canvas, P&L, discovery, UX, storyboarding, wireframing, prototyping, user stories, product analytics, KPIs, conversion funnels, growth strategy, lifecycle management, sprint prioritization, Kanban methodologies, financial modeling, product marketing, APIs, web applications, and cross-functional team management.

EARLIER EXPERIENCE

FINANCE · BOOKKEEPING · ADMINISTRATION · OPERATIONS (2010–2021)

Earlier roles at **Levi Trucks Strauss (1993) Ltd.** (Sole Bookkeeper), **Shaldag Group** (Head Bookkeeper), **Dermador Ltd.** (Bookkeeping & Assistant to VP Finance — US, South Africa, Spain & Israel), **iPlan Ltd.** (Administrative Manager), **Imaginarium Retail Ltd.** (Administrative Manager — 8-store network), and **Flying Carpet** (Flight Operations). Strong foundation in financial processes, reporting accuracy, vendor & client coordination, and cross-functional operational follow-through.
